

Kindly add the following claim ---

11. Combretastatin A-4 metal and ammonium phosphate prodrugs having the structure:

wherein [Y] X is selected from the group consisting of cesium, calcium, lithium, magnesium, manganese, zinc, imidazole, morpholine, piperazine, piperidine, pyrazole, pyridine, adenosine, cinchonine, glucosamine, quinine, quinidine, tetracycline, and verapamil.

REMARKS

Claim 9 has been amended, claim 11 has been added and claims 1-11 are in issue and do indeed replace original claims 1-9 as noted by the Examiner.

The Examiner's objections/rejections will now be addressed seriatim.

* * *

Item 1. The Examiner points out that the US application is based on a PCT and US provisional application. Applicant has amended the first statement of the Specification to adhere to this suggestion.
